

RN Transplant Coordinator
Weston, Florida

At Cleveland Clinic, we believe in a better future for healthcare. And each of us is responsible for honoring our commitment to excellence, pushing the boundaries and transforming the patient experience, every day.

We all have the power to help, heal and change lives — beginning with our own. That’s the power of the Cleveland Clinic team, and The Power of Every One.

Job Summary:

Under the general direction of the Program Manager and Administrator, coordinates all transplant patient activities.

Responsibilities:

- Assesses patient in outpatient clinic along with transplant physician.
- Facilitates plan of care and symptom management with outpatient staff.
- Coordinates scheduling with administrative coordinator for follow up appointments.
- Reviews with transplant physician medical information from referring physicians and initiates appropriate communication.
- Coordinates consultation with other disciplines and obtains follow-up information consult.
- Coordinates with the hospital unit personnel in the discharge of the transplant patient and donor.
- Assists in obtaining medications and supplies from the appropriate source according to the patient's insurance coverage.
- Assists in reinforcement of discharge information.

Education:

- Bachelor's Degree required.

Certifications:

- State licensure as Registered Nurse (RN) required, Certified Clinical Transplant Coordinator (CCTC) or obtained within 2 years of hire.

Work Experience:

- BSN with experience in transplant including disease related field.
- Five years experience may offset the Bachelor's Degree requirement.
