The Front Line of Patient Care
Our nurse professionals embody what it means to provide the best patient interactions possible. They also advance the art and science of nursing in a patient-centered, healing environment.

Heart Transplant – MCS Coordinator, Mechanical Circulatory Support
Santa Clara, California

In this role, you will be in the Center of Advanced Heart Failure therapies including mechanical circulatory support, heart transplant pre and post. You will provide case management for renal transplant candidates and/or clinical management of post-transplant patients and collaborate with internal and external providers to coordinate the plan of care and provide expertise in renal transplant care and treatment. In addition, you will be accountable for ensuring the effective coordination of transplant related patient care during the pre-transplant, transplant, and/or post-transplant periods.

Qualifications Include:
- At least five years of experience in any of the following: critical care, intensive care unit, emergency care, general medical/surgical services, acute care, dialysis, or transplant care services
- At least one year of experience in clinical transplant coordination or case management specializing in any of these areas: disease, population, or chronic disease management preferred
- A bachelor’s degree in nursing or a health-related field, or four years of experience in a directly related field; a master’s degree is preferred
- A graduate of an accredited school of nursing
- Current California RN license
- The ability to work effectively across medical specialties, communities, departments, and regions/divisions
