

KAISER PERMANENTE®

The Front Line of Patient Care

Our nurse professionals embody what it means to provide the best patient interactions possible. They also advance the art and science of nursing in a patient-centered, healing environment.

Post Kidney Transplant Coordinator San Francisco, California

In this role, you will provide case management for renal transplant candidates and/or clinical management of post-transplant patients. You will collaborate with internal and external providers to coordinate the plan of care and provide expertise in renal transplant care and treatment. In addition, you will be accountable for ensuring the effective coordination of transplant related patient care during the pre-transplant, transplant, and post-transplant periods.

Qualifications Include:

- At least five years of experience in any of the following: critical care, intensive care unit (ICU), emergency care, general medical/surgical services, acute care, dialysis, or transplant care services
- One year of experience in clinical transplant coordination or case management specializing in any of these areas preferred: disease, population, or chronic disease management
- A bachelor's degree in nursing or a health related field, or four years of experience in a directly related field with a high school diploma or GED; a master's degree is preferred
- A graduate of an accredited school of nursing
- A current California RN license
- The ability to work effectively across medical specialties, communities, departments, and regions/divisions
- The ability to communicate effectively with physicians and other clinical providers, as well as administrators
- Demonstrated skills in critical thinking, problem solving, and clinical case management
- The ability to work in a Labor/Management Partnership environment
