Clinical Specialist and Project Manager

NATIONWIDE
SALES/MARKETING/RESEARCH

At OmniLife, we are revolutionizing how the donation and transplant community work together with our communication platform. We all know donation and transplant is chaotic. We email, we call, we fax, we text – anything to get the job done. **Our communication platform helps get the right information, to the right people, at the right time.** The result are highly coordinated and adaptable teams to help OPO and Transplant teams to continually navigate the ever-changing landscape of transplant and to make the best possible donor-to-specific-recipient decisions, honoring the gift of life and ultimately saving lives.

As part of a recent reward of a $1.5M NIH SBIR Phase II grant, we will need highly clinically experienced donation and transplant coordinators or clinical managers who have worked at multiple transplant centers and OPOs and are technically skilled/savvy.

**Principle Accountabilities**

- Product Enhancements
- Product Implementation and Integration
- Clinical Marketing Content Generation

**Making a Difference**
OmniLife in Feb 2016, have raised +$5 million including 2 NIH SBIR Phase I/II grants, grown a team of experienced and passionate professionals, and delivered our first product, TXP Chat™ which is used by over 200 transplant clinicians and successfully facilitated over 500 life-saving transplants.

**Connected Purpose**
The connected purpose to the donation and transplant industry starts with the founders. Dalton Shaull, founder and CEO, received an experimental nerve transplant to regain function of paralyzed arm. Eric Pahl, founder and CSO, has a family history liver disease and uses machine learning to predict transplant outcomes.
