Transplant Coordinator

At Stony Brook Medicine, a Transplant Coordinator is a valuable member of our team, who provides clinical services to our patient population.

- Working with pre-transplant multi-disciplinary team to conduct new patient evaluations and re-evaluations of patients on annual basis
- Coordinates patient entry and introduction to the transplant program
- Coordinates pre-transplant education for patients and their caregivers
- Works with the outreach coordinator to provide professional education for community nephrologists and dialysis center staff
- Responsible for outreach activities and events for patients and referring providers
- Will act as the liaison between the transplant center and the community dialysis centers and Nephrology offers
- Responsible for providing education to patients and providers both on site and out in the field
- Coordinates medical, surgical, financial, psychosocial, nutrition, and pharmaceutical evaluation and on-going care needs of pre transplant patients
- Participates in patient care planning and selection conference
- Lists patients for transplant in a timely manner to facilitate access to donated organs
- Helps to maintain the UNOS waiting list according to program policies and procedures, regulatory requirements, and national guidelines
- Remains knowledgeable of all listed patients' status to ensure patient safety and facilitate organ placement in collaboration with transplant physicians
- Works with multidisciplinary team on performance improvement projects
- Attending meetings, national, regional, local and internal.
