

Clinical Director, Transplant

Tampa, FL

(190000QW)

Tampa General Hospital (TGH), located on beautiful Davis Islands in downtown Tampa, FL, is one of the largest and most comprehensive medical centers in Florida. TGH is a level one Trauma Center and a certified Regional Burn Center that excels in the care of critically ill patients.

TGH seeks a Clinical Director, Transplant. The Director reports to the Vice President, but also works collaboratively with the Medical Directors for the AODTI to provide primary direction for the clinical operations of AODTI Services which includes financial, budget, production, operational efficiencies, personnel management, coordination of clinical matters, strategy and marketing function of the programs. The Director is responsible for overseeing the operations of AODTI clinical practice areas and for ensuring that all center policies and procedures are appropriately implemented and adhered to, including those related to standards; staffing models, patient care practices and protocols.

Qualifications

Master's Degree required. Current RN license from the State of Florida preferred, minimum of 8 years of experience in advanced organ disease/solid organ transplantation, at least 5 years of progressive management experience, and 3 years of experience outpatient practice management.
