Living Donor Coordinator - RN - Transplant Services (Kidney Acquisition)

UTMB Health
Galveston, TX

Minimum Qualifications
- Registered Nurse with a Bachelor Degree in Nursing (or related field)
- Current Texas licensure.
- A minimum of 3 years of surgical/medical experience

Job Description

With minimal supervision, serves as a clinician with advanced knowledge and skills demonstrating a high degree of professional competence and autonomy in the care of living donors within the transplant program.

Serves in a variety of roles including: clinician; collaborator; educator; consultant; researcher; and patient advocate to living donors, families, and staff as necessary. Additionally acts as a consultant/liaison to internal and external customers.

The Living Donor Coordinator is a designated member of the transplant team and is primarily responsible for coordinating clinical aspects of living donor care throughout all phases of living donation.

The Living Donor Coordinator works with living donors and their families from referral, through the evaluation and continuing during and after the donation procedure, in a compassionate and tactful manner in order to provide and facilitate access to continuity of care and ensure informed consent.

Demonstrates understanding and the ability to facilitate the referral process when contacted by a potential living donor to include completion of donor referral information and verification of the potential recipient’s candidacy for living donor transplant. Pre-Evaluation Phase

Provides referral, and promotes access, to the Independent Donor Advocate (IDA) prior to initiation of evaluation testing.

Preferred Language

Bilingual (Spanish and English) preferred but not required.
