- Five (5) years of experience within a transplant quality program
- Five (5) or more years of experience serving as a quality/performance improvement manager or director

Preferred License/Certificate

Six Sigma Green Belt or Certified Professional in Healthcare Quality (CPHQ) certification

Job Description

The QAPI Manager, Transplant Services is tasked with developing and maintaining the QAPI program and an educational framework that ensures all transplant program and other hospital department staff have knowledge of new and existing regulatory requirements related to quality and patient safety.

They will serve as the key liaison during survey activities. They will also serve as advisor and subject matter expert in Joint Commission, CMS, UNOS (United Network for Organ Sharing) and other regulatory agency standards and policies.

The manager oversees staff that aid in developing and implementing new programs aimed at improving or maintaining departmental effectiveness and efficiency, and reviews identified opportunities for improvement. This individual supervises the transplant quality and outcomes coordinator and other designated support staff.
