Job Postings Descriptions

Transplant Coordinator - RN

Beth Israel Deaconess Medical Center
Boston, MA

To apply: <https://jobs.bidmc.org/job/boston/transplant-coordinator-rn/169/1634404672>

Description: In coordination with transplant physicians and surgeons, The Transplant Coordinator - RN provides care to transplant recipients and live donors throughout all phases of transplantation or donation including evaluation, pre-transplant/donation, the transplant/donation surgery and post-transplant/donation. Serves as the primary contact for patients; provides ongoing education to the patient, monitors the patient status throughout the process and coordinates care with all members of the transplant team. Ensures that the responsibilities associated with the role coordinator are carried out in a manner that meets all regulatory requirements for a transplant program. Training, evaluation and competencies for this role are overseen by a Nurse Leader to the department.

Required Qualifications:

- Bachelor's degree in Nursing required.
- License Registered Nurse required., and Certificate 1 Basic Life Support required.
- 3-5 years related work experience required.

Essential Responsibilities:

- Coordinates information from referring physician, testing and clinic visits required for potential transplant recipient and living donor as defined in clinical pathways.
- Provides educational information to recipients, donors, primary caregivers regarding all aspects of transplantation/donation including pre-transplant, operative procedure, post-operative management and monitoring, long term follow-up and research protocols.
- Participates in the medical and surgical outpatient clinics with the collaborating physicians and surgeons; reviews outpatient lab values and testing results; works with physician/surgeon as needed to adjust care plan.
- Coordinates and facilitates discharge planning with in-patient team to maintain continuity of care.
- Provides accurate, appropriate and timely documentation to meet state and federal regulatory requirements.

RN Abdominal Transplant Coordinator

University of Mississippi Medical Center
Jackson, MS

Job Summary:

Transplant coordinators coordinate solid organ (liver, kidney, pancreas and multi-organ) transplantation of all pediatric and adult organ recipients. The transplant coordinator is a primary member of a multidisciplinary team responsible to coordinate the care of transplant patients and provides follow-up and care throughout the continuum of care including pre-transplant, transplant admission and post-transplant phases. You will educate patients, families and other care givers to the unique aspects of transplantation including; organ donation, pre transplant care, peri transplant care and post-transplant / follow up care. You will serve as a clinician, educator, investigator, consultant and leader, and you will make clinical judgments based on a synthesis of current research, concepts, principles, theories and outcomes to solve complex problems.

You will educate medical professionals on unique aspects of transplantation including; organ donation, pre transplant care, peri transplant care and post-transplant / follow up care. You will maintain regulatory integrity and adherence to established regulations throughout all processes.

As an integral member of the larger multidisciplinary team, the transplant coordinator contributes to excellence in patient care, research teaching and in providing leadership to the organization.

Education & Experience:

An associate's degree in nursing and one year of nursing experience in an intensive care environment or related nursing experience is required. BSN and transplant experience are preferred.

Certifications or Licenses Required:

Valid Mississippi RN license and BLS are required.

ACLS preferred.

Certified clinical transplant coordinator (CCTC) preferred within 3 years of employment.

Transplant Waitlist Coordinator (RN/NP)

Tufts Medical Center · Boston, MA

Part Time, Days, 8-4, 40

The Tufts Medical Center Kidney Transplant program is a dynamic and growing program. The Transplant Department provides care to pre and post-transplant kidney recipients and living donors. This transplant nurse coordinator will support the kidney and pancreas transplant programs. Working in the outpatient clinic Monday-Friday this nurse coordinator will work closely with transplant nephrologists, transplant surgeons, social workers, practice assistants, and other nurse coordinators who work with the kidney patients. The responsibilities include management of patients throughout all phases of transplantation: evaluation, listed for transplant and post-transplant as well as living donors. While all coordinators will have knowledge of each phase, each coordinator has primary responsibility for the patients in one phase of the process. Additional responsibilities will include managing some transplant nursing quality initiatives as well as UNOS data entry.

The Transplant Program Referral and Network Manager is responsible for actively maintaining current network market share and expanding new network opportunities for the Transplant Program throughout the New England Region. This person is the single point of contact for all elements associated with new patient referrals for transplant evaluation. Within this role the manager will provide information, education and support to the Tufts Medical Center providers and the programs network of referring providers.

Qualifications:

- BSN required; Master's degree preferred
- BLS Certification required
- ACLS Certification preferred
- Current Massachusetts Registered Nurse License or Nurse Practitioner license
- 2-5 years' experience in Kidney Transplantation, preferably outpatient experience
- Experience with Transplant Medical Records System, Teleresults
- CCTC certification preferred
- Master's Degree in Nursing Education preferred
- Knowledgeable in CMS and UNOS regulations

Clinical Nursing Kidney Transplant Manager

The Advanced Organ Therapies (AOT) Service Line at California Pacific Medical Center (CPMC) is looking for an experienced nurse to lead their nationally recognized kidney transplant team. The right leader will be a very focused, high-driven registered nurse who has considerable experience in the kidney transplant arena, as well as a proven track record as a leader. The position provides day-to-day leadership of the transplant coordinators, pharmacist, and transplant specialists within the kidney transplant program. This position has a dual reporting relation to the Medical Director, Kidney Transplant and the Director, AOT Service Line.

CPMC is a quaternary-care hospital located in San Francisco and serves as a referral hub for Sutter Health's extensive network of outpatient centers and 24 acute care facilities throughout Northern California. CPMC In 2019, we moved into a state-of-the-art hospital and ambulatory care building at our new Van Ness Campus.

Qualifications:

- BSN required. Master's degree in a health care related discipline preferred.
- Preferred: 5 years' experience in kidney transplant.
- Preferred: 3 years' experience as a supervisor/manager.
- Preferred: EPIC experience.

For more information and to apply, please visit: <https://jobs.sutterhealth.org/job/san-francisco/clinical-nursing-manager-kidney-transplant/1099/17296840> or contact the recruiter, Angela Hawkins, directly at HawkinA@sutterhealth.org.

Sutter Health is an Equal Opportunity Employer (EOE M/F/Disability/Veterans).
